

Fall Protection Certification in Nanaimo

There are high numbers of injuries at work associated to falling and lots of fall-related deaths reported each and every year. Most of these instances might have been prevented with better training, better measures in place, and by properly equipping workers before the possibility for injury takes place. The third leading cause of death in the workplace is due to lack of correct fall protection. This falls behind violence in the workplace and automobile accidents.

The number one cause of death in the construction trade come from fall-related accidents. There is more potential for fall accidents depending on the kinds of work being carried out in your workplace. Hence, being familiar with the unique dangers that exist within your work atmosphere and in your work situation can help you address dangerous situations and be ready for them before they take place as well as help you prevent fall injuries and deaths.

It is a good idea for your company to encourage regular workplace training and to encourage fellow staff to follow the precautions and to take them more seriously. Implementing an environment that encourages training and safety at all times could help you as well as your co-workers avoid predictable accidents.

An implemented regular safety program at work would help to be able to prevent future injuries, to be able to prevent potential safety related lawsuits, and so as to prevent possible PR problems for your business. Fostering respect and cooperation amongst your workers and foremen, concerns could be prevented with worker unions. The best reward would be that you would avoid your personnel paying with their lives and or serious health situations that may have been avoided if the right measures had been used.
