

Nanaimo Aerial Lift Train the Trainer

Nanaimo Aerial Lift Train the Trainer - The train the trainer program meant for aerial lifts helps to teach the trainers how to safely train potential operators in an industrial situation. Trainers will be given in-depth instruction on the workings of aerial lift machines. The program is offered on an open enrollment basis and delivered at selected training sites. Before the certification, trainers are assessed and scored based on their demonstrated skills and understanding.

The Aerial Lifts Train the Trainer Certification Program emphasizes practical learning. As the number one training provider in the business, we offer the best hands-on training possible through chances to practice techniques and concepts learned inside the classroom. Along with hands-on experience, trainers develop general understanding of instructional methods and machinery theory, classroom and field communication skills, and ability to successfully train and evaluate operators. Trainers would gain an understanding of what traits make an effective trainer.

The Aerial Lifts Train the Trainer Program likewise teaches the right methods necessary in order to express the right information inside the classroom and field environment. There are three aspects of equipment operation which the trainer must learn how to convey to operators: what to perform; how to do it; and why it must be done.

The program offers detailed, up-to-date reference material in order to help trainers convey the subject matter to equipment operators. Instruction manuals include detailed information regarding all aspects of industrial mobile equipment operator training. Included in the package are training aids which provide a visual reference to be able to enhance the learning experience. The equipment-specific training products contain essential materials intended for both the trainer and the operator: overhead transparencies, videos/DVD's, safety message posters, equipment models; stability pyramids and digital training aids.
