Forklift Training Tips
The following checklist is vital for whatever workplace that has forklifts on the premises. Each of these questions must be answered with "yes" if all the safety rules and regulations are being followed. A "no" to whatever question indicates a procedural flaw which may lead to accident, injury or damage to equipment.

1) Is the operating area of the forklift separate from the traffic of pedestrians?
2) Is pedestrian access to forklift travel areas restricted by barriers?
3) Are pedestrian walkways provided and well marked?
4) Are "forklift in operation" signs visibly clear?
5) Are mirrors for pedestrians and drivers provided at blind spots?
6) Are changes to daily forklift schedules communicated to all affected workers?
7) The forklift tires being used are suitable for all operating surfaces?
8) Is the seatbelt being utilized?
9) Is the seat in good condition?
10) Is a regular forklift maintenance schedule followed?
11) Are yearly checks of the forklift being done?
12) Is the forklift right for the needed tasks?
13) Is there a load chart that is readable on the forklift?
14) Could the operators understand and read the load chart?
15) The chart lists the safe lifting capacity for all attachments and their uses?
16) Do the forklift warning devices work right?
17) Is the operating speed control device fitted right?
18) The lift truck overhead cage is fitted correctly?
19) Do the operators of the forklift have certifications to use the machinery?
20) Speed limits and warning signs are being observed?
21) Are lift truck operators up to date on training for all kinds of lift trucks being operated?
22) Forklift operators know their responsibilities to report the damage to the machinery and other lift truck accidents?
23) Is the pre-test checklist reviewed each and every day prior to the machinery being utilized?
